

SIMPLIFY CODE REVIEWS AND ENFORCEMENT WITH CLOUDPERMIT

## ICC Code Connect API

Cloudpermit now integrates with the **ICC Code Connect API**, giving your staff instant access to your municipality's adopted building codes — all directly inside our platform.

That means no more switching between systems, and no more outdated references. Instead, you'll be able to offer faster, easier, and more accurate plan reviews and inspections.

## KEY BENEFITS OF CLOUDPERMIT'S ICC CODE INTEGRATION

### Real-Time Code Access

Quickly reference the latest versions of your municipality's adopted ICC codes (IBC, IRC, IMC, etc.) without leaving Cloudpermit.

### Consistent Enforcement

Equip every staff member with the same, up-to-date codebase to ensure clear, consistent decisions.

### Improved Customer Service

Give applicants, designers, and contractors quicker answers and greater transparency about the standards that apply to their projects.

### Streamlined Plan Reviews and Inspections

Inspectors, reviewers, and permit staff can save valuable time by accessing the right code sections during their workflow.

### Save Time and Increase Accuracy

Eliminate manual code lookups and reduce the risk of referencing outdated requirements.

## Why it Matters

Building safety depends on clear, consistent enforcement, and that starts with reliable, accessible code information.

Cloudpermit's new ICC integration supports your municipality's commitment to compliance, transparency, and faster service throughout the community development process.

Cloudpermit's community development software simplifies processes and enables online solutions for permitting, licensing, planning, enforcement, inspections, and public works.
