

Take Control of Your Municipality's Building Safety Efforts

Make public safety and fire prevention easier to manage with tracking, routing, and streamlined recurring inspections.

WITH CLOUDPERMIT, YOUR DEPARTMENT CAN:

Conduct Recurring Fire Safety Inspections

Efficiently ensure compliance without the need for a full application workflow — simply select a property, conduct the inspection, and see the full inspection history.

Inspect Short-Term Rentals

Manage annual inspections to comply with local regulations for short-term properties where a license or permit isn't required.

Work Anywhere

Purchase our comprehensive mobile app for inspections to upload notes and photos right from the field — even if you're offline.

Make Inspections Easier

Streamline your work with automated results notifications and centralized data for staff and citizens.

Integrate with Your GIS

Access up-to-date, real-time property information from the field or office and plan optimal routes for inspections.

Simplify Reporting

Filter data and generate reports on demand with just a few clicks.

Get Started Quickly

Cloudpermit can go live in just a few short weeks — no third-party implementation or lengthy development period necessary.

Cloudpermit's community development software simplifies processes and enables online solutions for permitting, licensing, planning, enforcement, inspections, and public works.
